

CareerScope® v10 — Comprehensive Career Assessment

CareerScope is a two part assessment.

1. Part One: This part of the assessment is a list of questions about your interests. There are no right or wrong answers. I just simply want to know you likes and dislikes pertaining to different fields of employment.
2. Part Two: The 2nd part of the assessment is a number of timed tests that assess your verbal aptitude, math skills, etc.

CareerScope then takes the answers from both parts and combines them to give you a list of possible career paths you can take that match both your interests and abilities.

To start this task, the ABE office will contact MNWest and then provide you with a username and password. You will then be able to go onto the MNWest website and follow the path to CareerScope and log in to the portal using the username and password you were given and take the assessment.

After completing the assessment, you should email Linda Pesch, I will include her contact information below, and let her know you are a registering for the CNA class and have completed the assessment. Linda will process the assessment and email you the results. You will need to bring a copy of the “Summary” portion of the results to the ABE office to go in your file.
